

DESIGN BUILD
Auburn University

The *Master of Design-Build* Program at Auburn University

A Collaboration between

The School of Architecture & The McWhorter School of Building Science

The design and construction industries in the U.S. are experiencing significant changes in the relationship between their respective professionals and the delivery systems they employ to help clients realize successful projects. Through a variety of models, these formerly fragmented professions are now crafting new ways of working together – and exploiting new collaboration technologies - to create more efficient, economical and sustainable projects in the built environment.

The *Master of Design-Build* program at Auburn University seeks graduate students from the design, engineering and construction disciplines who will embrace teamwork, collaboration, and empathy between the differing roles and responsibilities of their counterparts. The program will foster an *Integrated Delivery* of projects in the built environment, leveraging the most current strategies in project development, risk analysis and digital tools. Join us from 9:00 – 1:00 on November 13th, 2009 for an “Open House” to find out more.

www.cadc.auburn.edu/design.build

Open House Itinerary 13 November 2009

- 9:00 – 9:30 Continental breakfast at the M. Miller Gorrie Center
- 9:30 – 10:00 Introductions, Meet Co-Directors and Program Faculty
- 10:00 – 10:45 Presentation of Design Build Program
- 10:45 – 11:45 Tour of studio and facilities; meet current DBLD students
- 11:45 – Noon Break
- Noon – 1 Lunch with prospective students of all CADC graduate programs

Professor Paul W. Holley

Master of Design-Build Program

The School of Architecture &
The McWhorter School of Building Science
118 M. Miller Gorrie Center
Auburn, AL 36849
